

Important notice please read

The **Sprint V range** was originally designed and brought to market back in 2006.

Manufacture was discontinued in 2012.

We are now unfortunately getting to the stage where spare parts are getting very low, so we feel it only correct to give our customers as much notice as possible.

Therefore service and repairs on this product range will become limited and probably cease completely over the next 6-9 months, depending on how long the spare parts we do have last. But currently we can still service these units.

If you have any concern or questions please do not hesitate to call: 01923 274737 for further guidance.

Loyalty discounts will be made available to support our valued customers on replacement units.

Please note Sprint eVo range is not effected
